Home use:

- Compile and create your own Music-CD's for use in the car or portable CD player
- Become your own movie director – create your own DVD's and play them on your home DVD player
- Create a professional looking disc using Lightscribe labeling technology
- Make a backup of all your important documents and files

Office use:

- Make an extra backup of your valuable work files
- Create professional CD's or DVD's with your company information to send out to your clients
- Create professional looking labels using Lightscribe labeling technology
- Use the Freecom DVD RW Recorder for software installations on multiple PC's

New! - Meet the latest generation of Freecom external DVD RW recorders. A new, fresh, high quality design combined with the latest technology Super Multi DVD RW drives, that read from and write to any CD and DVD recordable format, including DVD+R(W), DVD-R(W) and DVD RAM.

Cost effective - To date, CD's and DVD's still remain the most used and cheapest format for making quick backups and exchanging or sharing data. Double Layer recording enables you to store up to 8.5GB of data on one DVD, at an unmatched price per Gigabyte.

Convenient - With today's high speeds burning a CD takes only a couple of minutes. With the fast, reliable external Freecom DVD RW recorder you can burn a CD or DVD wherever you are. Connecting and installing has never been easier – just connect the Freecom DVD RW recorder to your computer via USB or FireWire, install the CD and DVD burning software via the convenient install menu from the CD, and you're ready to go !!

Multiple Interface: this drive has both USB 2.0 and FireWire connections, making it perfect for use on a PC and/or Mac computer.

Revolutionary: The Freecom DVD RW Recorder LS Pro features Lightscribe laser labeling technology, a revolutionary system which burns a perfect label directly onto your lightscribe CD- or DVD recordable disc, using the same disk drive that burns the data. Just burn the data, flip the disc and burn the label.
